- Insulated concrete form (ICF) walls and/or foundation
- ACH 50 < 2.5 or CFM50/SF of enclosure ? 0.25
- Central Manifold Plumbing Design
- Hot Water Recirculation Pump

TESTIMONIAL

We were in an apartment and our [2-year-old] son, developed this cough. It got to the point that he wasn't able to sleep at night. He was up all night coughing. We knew Charis built a cleaner home, but we never really knew what that meant until we experienced it. Within a week, it [his cough] started to clear up. He was acting like himself again. He was able to run around within three months. He was a completely different child; he was acting like a little boy again.
