- All-electric home
- Compact (core) plumbing design
- Energy / Heat recovery ventilator
- Heat pump water heater
- High-performance wall with continuous insulation
- Triple-pane windows
- ACH 50 < 2.5 or CFM50/SF of enclosure ? 0.25

TESTIMONIAL

In our previous home, when it would get really humid outside, we'd hit 60% to 80% inside. This summer it's been 90 degrees with 70% humidity outside and we've barely crested 50% humidity in our new home, even on the worst days. So it's been significantly more comfortable.
