AquaZephyr, LLC

Eco-Village Ithaca | Ithaca, NY

PROJECT DATA

- **Layout:** 3 bed, 2.0 bath, 2 fl, 1664 ft^2
- **Climate:** 2021 IECC Cold Humid
- **Category:** Production

Modeled Performance Data

- **ERI:** with PV 15

TESTIMONIAL

The tight envelope keeps the internal temperature very livable, despite extremes of outside heat or cold. It takes very little additional heat during the coldest winter days. In the summer, cellular window shades keep the house safe from too much solar gain. Ceiling fans provide the only necessary additional internal cooling.
- Homeowner

KEY FEATURES

- All-electric home
- Energy / Heat recovery ventilator
- Photovoltaics
- Triple-pane windows
- ACH 50 < 2.5 or CFM50/SF of enclosure ? 0.25
- Double Walls
