- **Climate:** 2021 IECC Mixed Humid
- **Category:** Custom

Modeled Performance Data

- **ERI:** with PV -17

TESTIMONIAL

We are thrilled with our Zero Energy Passive House. We generate more power than we use [and it] fulfills many other goals, ranging from aging-in-place to resiliency. [It's] always the right temperature. Not only are we exempt from power outages, but recently our house was a refuge during the smoke inundation from wildfires.
- Homeowner

KEY FEATURES

- All-electric home
- Compact (core) plumbing design
- Energy / Heat recovery ventilator
- Heat pump water heater
- Photovoltaics
- Battery storage
- Triple-pane windows
- ACH 50 < 2.5 or CFM50/SF of enclosure ? 0.25
