## TESTIMONIAL

When we found out there were zero net energy homes being built in New Paltz, we were excited to check them out. We had heard good things about the efficiency of geothermal heating/cooling systems, and the prospect of a home with geothermal and solar power was of great interest. We were pleasantly surprised to find out that Anthony's homes offered so much more than that! From the ICF walls to the heat recovery system to triple-pane low-e windows, our new home is packed with features that make it not only energy-efficient, but ultra cost-efficient, as well.
