- **Climate:** 2021 IECC Cold Humid
- **Category:** Custom

Modeled Performance Data

- **ERI:** with PV 41

TESTIMONIAL

I simply show people what is possible, and let my customers make the responsible decisions. He [the homeowner] always selected the most cutting-edge option, bringing this house to a level probably never seen before. With almost 83% of the total annual heat requirement coming from passive solar gains, and most of the remainder being supplied by the solar hot water system ... this is a true zero-energy home, with an annual energy cost of -$51.
- Ted Clifton, designer, Zero Energy Home Plans
