

PROJECT DATA

- **Layout:** 3 bed, 2.0 bath, 2 fl, 2508 ft²
- **Climate:** 2021 IECC Cold Humid
- **Category:** Production

Modeled Performance Data

- **ERI:** with PV -37

TESTIMONIAL

It costs about \$100 a square foot to build a house to code here; our DOE Zero Energy Ready Homes cost just \$1.43 per square foot above this, including the land and the driveway. The homes perform so well that during a recent winter power outage, while outdoor temperatures were in the 20s, inside the home only lost 3.6°F over an eight-hour period.

- Carter Scott, president, Transformations Inc.

KEY FEATURES

- All-electric home
- Cold-climate heat pump
- Photovoltaics
- Triple-pane windows
- ACH 50 < 2.5 or CFM50/SF of enclosure ? 0.25
- Double Walls
