TESTIMONIAL

This is my first home and going into this experience, I wasn't aware of all the benefits a DOE Zero Energy Ready certified home offers. The New Town team did a wonderful job explaining all the energy advantages my new home would offer. In my first walk-through with the construction superintendent, he made sure I understood how the house was framed. My favorite part was knowing that I would have that extra barrier of safety and sound protection in the 'party' walls. I don't know the name of the 24-hour air circulation equipment, but it has been amazing. My previous apartment made my allergies terrible. Since moving in, they have gotten much better.
