- **Climate:** 2021 IECC Mixed Humid
- **Category:** Production

Modeled Performance Data

- **ERI:** with PV 45

TESTIMONIAL

We think the house is energy efficient because we don't see/hear AC unit running all the time, but the temperature at the house stays set to what we want, even on hot days. We had quite a few of them in May and June … I hope to see similar efficiency during the winter season and the heat not escaping.
- Homeowners

KEY FEATURES

- Raised-heel trusses
