Modeled Performance Data

- **ERI:** with PV 48

TESTIMONIAL

Since we only build 100% zero energy-ready homes, our entire business plan is based this. Our measure of success is sales. In our markets, we are either the leading builder or in the top three. Since going 100% zero energy ready, we have seen our average sales price increase by $30,000!
- Tom Wade, Palo Duro Homes

KEY FEATURES

- Photovoltaics
- Raised-heel trusses
- ACH 50 < 2.5 or CFM50/SF of enclosure ? 0.25
