• Climate: 2021 IECC Cold Dry

• Category: Custom

### **Modeled Performance Data**

• ERI: with PV 21

# **TESTIMONIAL**

We wanted to have a very well-built, energy-efficient home for our new residence in the mountains of Durango, Colorado. Our electric bills have been zero (we actually have a net credit due to our photovoltaic system). The cost of propane to heat the house ... has only been about \$350 from July through May! Pretty remarkable for a 3,800-square-foot home in this climate!

- Homeowner

# **KEY FEATURES**

- Energy / Heat recovery ventilator
- Electric Vehicle Charger Installed or Wired for Charger
- Insulated concrete form (ICF) walls and/or foundation
- Photovoltaics
- Raised-heel trusses
- Triple-pane windows
